# HOW TO PLAY

- 1** Place your bet.
- 2** The dealer deals you seven cards, face down.
- 3** Pick up your cards, and split them into two separate poker hands—one hand of five cards (the “back” or the “high” hand), and one hand of two cards (the “front” or “low” hand). Your five-card hand must have a higher poker rank than your two-card hand.
- 4** Compare your hands to the banker’s. To win, both of your poker hands must be higher in value than the banker’s corresponding hands.
- 5** If only one of your two hands is better than the banker’s, it’s a push (a tie). If neither of your hands are better, you lose.

# PAYOUTS

If both of your hands beat the banker's corresponding hands, you win even money. If you bet \$10, you win \$10.

If only one of your hands beats the banker's, it's a push. You keep your original bet.

If neither of your hands beats the banker, you lose.

Each player's winnings—and the net winnings of the banker—are subject to a five percent commission, which is collected by the dealer.

## SIDE BETS AND BONUS

### **Fortune Bonus**

A side bet that pays if any combination of your seven cards creates a poker hand listed on the payout table, regardless of how you set your hands in the basic game.

### **Envy Bonus**

If any player at the table gets a four of a kind or higher, the envy bonus is paid out to everyone who made a fortune bonus bet of \$5 or more.

# DOUBLE THE FUN

**Fortune Pai Gow Poker is played using a deck of 52 cards, plus one joker. The joker can be used only as an ace, or to complete a straight, a flush, or a straight flush. To win, you must beat the banker's hand.**

Playing more doesn't mean you'll win more. If you add it all up, you might lose more than you win.
